Dear Project Manager, Fiber Experiment
Google

Google and *Google, Kansas* (aka Topeka, Kansas) are the perfect match! GO Topeka the economic development division of the Greater Topeka Chamber of Commerce wants you to experience our red carpet treatment, geared up for your technology move to Topeka/Shawnee County. What an opportunity for Topeka the capitol city of Kansas in middle America, to join you on the information highway at 'warp speed!'

Google, Kansas is a wonderful community that embraces the business community and desires to showcase this capital city as the business growth center of Kansas and the nation. Topeka's central location makes us a perfect setting to embark on a partnership with Google to advance broadband technology services and enhance our community's attractiveness as the trailhead of the information super-highway and the ideal location for all types of business and a diverse population.

Together Topeka/Shawnee County has recently expanded our ability to serve all sizes of businesses through the acquisition of 1,018 acres of land for the new Kanza Fire Commerce Park. We have great highways, we are the foundation of the grand Atchison, Topeka, and Santa Fe Railroad and continue to have superb rail access to move goods, our airport is equipped with some of the longest runways in the country and we even have a U.S. Coast Guard operation right here in the middle of the country. With Google's technology we will be the absolute inclusive center point for communication and transportation throughout the country and abroad.

Topekans are excited; the people here are the best you will ever meet. They are hard- working, fun-loving, family-friendly folks who have become energized with the idea of Google choosing our city as the location for the fastest internet service ever. We are here, right here in the middle of the U.S. We're ready, we're motivated and we have our red carpet ready to roll. Come to Topeka – *Google, Kansas* – your future and ours!

Genuinely honored,
